

ALUMINUM INSULATION TAPE

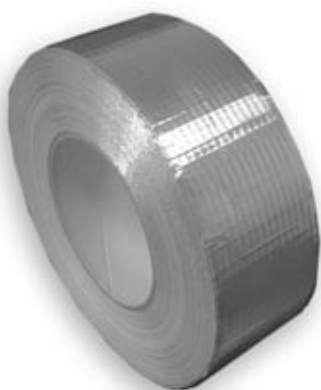

DESCRIPTION

Single sided self-adhesive aluminum insulation tape. Used in production and assembly of AC and ventilation devices, dust removing systems as well as heat engineering. To be applied on the insulation bends and forks, on material and mineral wool or glas wool segment connections. Ensures a coherent aluminum insulation layer which prevents water from penetrating the system. Hardly combustible according to DIN 4102-1-B1 standard.

REINFORCED ALUMINUM INSULATION TAPE

DESCRIPTION

Single sided self-adhesive aluminum tape reinforced with 5x5 mm carbon fibre net, laminated with polyethylene. Higher mechanical durability as compared to plain tape. Widely used in technical assemblies.

Carrier aluminum, thickness: 0,03 mm

Total thickness 0,15 mm

Glue: acryl

Temperature range: -20°C; +80°C

Peel adhesion: 25 N/25mm
